

# SHARPS DISPOSALL

The majority of accidental blood exposures offshore that occur as a result of sharps poking through garbage bags. Sharp objects have a way or working themselves to the sides or bottom and the puncturing thin bags, lurking there for an unsuspecting victim.

**Razors**

**Lancets**

**Needles**

## What Can I do?

**DISPOSE** of **ALL SHARPS SAFELY**. Contact the Medic if you need a safe disposal container for medical sharps that regularly come in contact with your blood. Only use an approved sharps container for these. A double edged razor blade can be placed in several folds of paper or two cardboard pieces and bound with tape so there is little chance it will come free. Disposable razors can be placed in paper and bound.

### Atlantis Medical Sharps Disposal:
